Get In Gear With A Career In Diesel Technology!

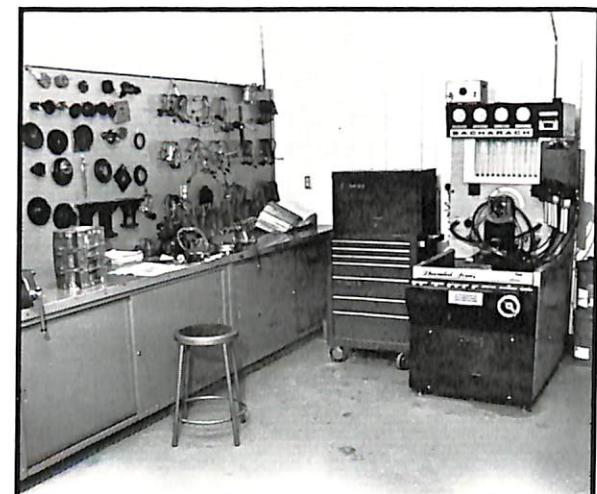

Diesel Technology Industry

Repair of heavy equipment used to be done under the shade tree, usually by the owner of these vehicles. Early diesel engines were relatively uncomplicated, and very little training was needed to repair them.

Today's technology has made it practically impossible for the untrained person to repair his own equipment. The result of this technology has greatly increased demand for diesel technicians.

There are career options in the diesel industry. The demand for repair technicians for ag machinery, trucks and even cars is increasing with the growth of the auto industry.

Get into the fast-paced, high technology diesel industry today. Call or write for further information on how to start a career as a diesel technician.

Dodge City Community College

Diesel Technology Program Facts

The diesel technology program is set up on the self-directed learning system. This system allows students to move through the program at their own pace so that maximum learning levels can be achieved. Using the self-directed system of instruction also helps make more time available for individual instructor attention.

Persons interested in the diesel technology program can start at any time during the regular school year, provided an opening is available.

Students have several educational options:

- One-year certificate in diesel technology only
- Two-year certificate in a combination of automotive technology and diesel technology
- Two-year Associate of Applied Science or Associate of General Studies degree in diesel technology

Diesel Technology Program

Advisory Council

The Advisory Council is composed of persons in industry who are interested in Dodge City Community College. They help us keep abreast of changes in industry, the demands of employers, and what the future holds for our graduates.

The Advisory Council is familiar with our college, our goals, and our standards. They have hired our graduates in the past and know the results of our training. Several members of the Advisory Council use our training as a prerequisite for employment.

Placement Assistance

Job placement assistance will be provided to students who successfully complete the diesel technology program. Currently, placement percentages are very good for those students having a genuine desire to work in the diesel industry after graduation.

Course Content

- Air Conditioning/Heating
- Applied Mechanisms
- Basic Mechanics
- Brake Systems
- Charging Systems
- Communication Skills
- Diesel Engine Tune Up
- Diesel Fuel Systems
- Electrical Systems
- Engine Computer Control Systems
- Engine Fundamentals
- Engine Overhaul
- Environmental Safety
- Hydraulic Systems
- Occupational Experience
- Power Trains
- Practical Math Applications
- Seminar - Diesel
- Shop Business Practices
- Starting Systems
- Suspension/Steering
- Welding

Financial Aid

Dodge City Community College has developed a variety of financial aid packages to assist students in overcoming economic problems associated with college attendance. DCCC accepts financial aid applications and makes decisions regarding those applications without regard to sex, race, creed, disability, or national origin.

Students who wish to apply for a Pell Grant or Stafford Loan must first establish their eligibility by completing their ACT Family Financial Statement and have their expected family contribution determined. It takes approximately four to six weeks to process an ACT Family Financial Statement. If a student is determined eligible to apply for a loan, it takes at least another three to four weeks for the loan application to be processed.

To qualify for any federal financial aid, a student needs to have a high school diploma or GED. Students who do not meet these requirements may arrange to take a vocational test to determine ability to benefit. Contact the DCCC Testing Center well in advance of the class starting date to arrange for testing.

Veterans who meet eligibility requirements may receive benefits for credit courses taken at the college. For more information call (316) 225-1321, Ext. 208.

Any student with a financial concern is encouraged to contact the DCCC Financial Aid Director for additional information.
